Says

Need some tool to classify Flora and Fauna

The tool should allow to add new data of species

It should suggest best practices

It should contains most of the existing data of species

Thinks

Will it work without the Internet ?

Wheather it work on every device

Is it user-friendly

Do i need any training to use the software

Does

Preserve, Restore, and Protect natural habitats

Studies about different species on the planet

Make observation about organisms and their environment

helpers hikers to know about specific species

Feels

Believes Natural forces operate the universe

Responsible for nature

Fears weather the tool might not able recognize the endangered species

Excitement with the output of the tool
